بنك الخليج
GULF BANK

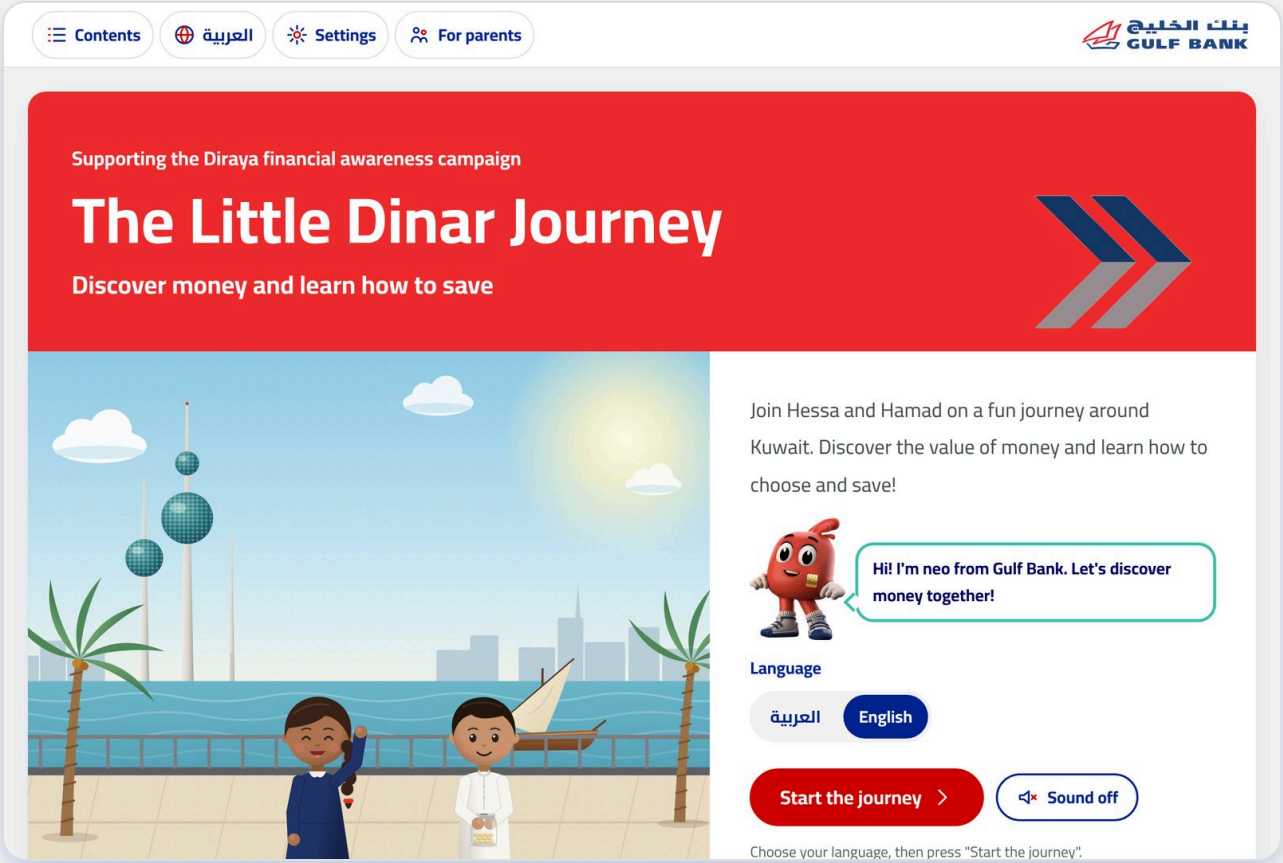

The Little Dinar Journey

رحلة الدينار الصغير

An interactive money book for children in Kuwait, in Arabic and English, with neo

Draft for approval

Supporting the Diraya financial awareness campaign
November 2026

SUMMARY

A working draft is ready for your review

Children read a short illustrated story about Hessa and Hamad, and on every page they try the idea themselves: counting fils, planning a budget, saving for a goal, using a bank account safely. neo, Gulf Bank's children's savings account, appears as a friendly guide.

15
numbered pages, cover to finish

2
languages, Arabic first, switch any time

7–11
suggested reader age

15–25
minutes for a first read

0
personal data collected

What exists today

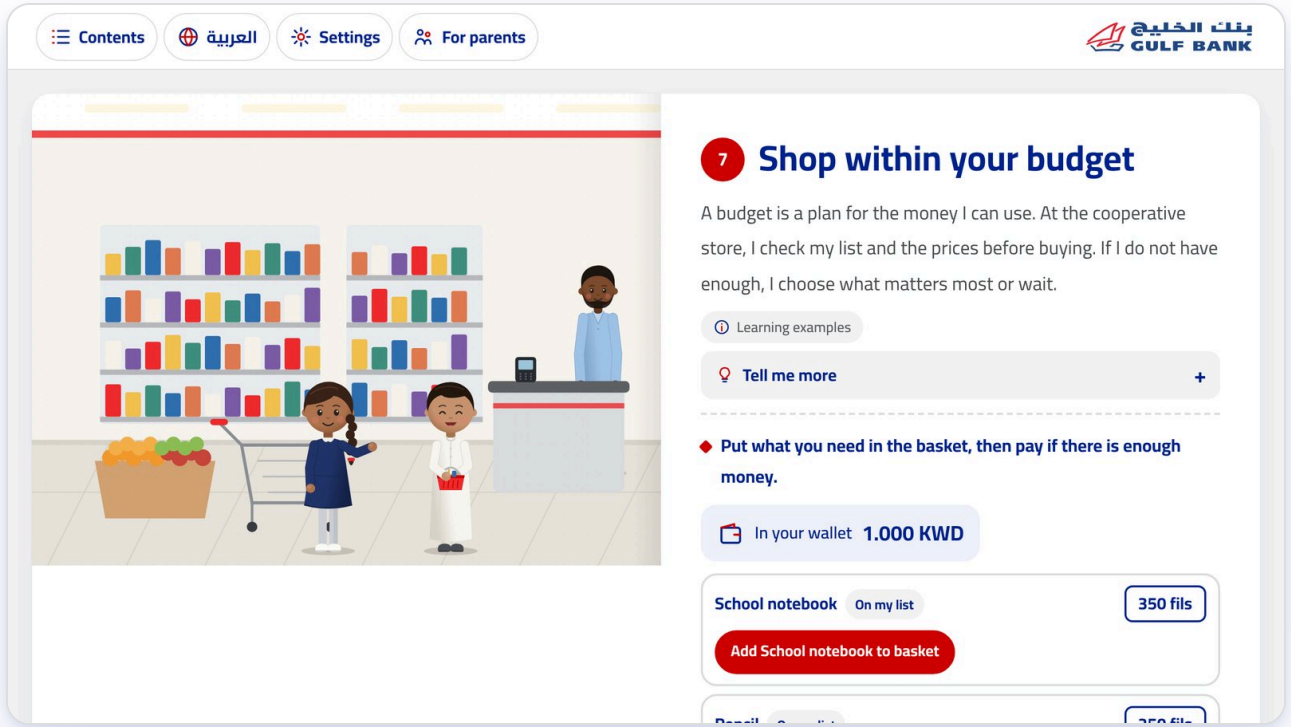

- The full book works in a browser on phone, tablet and desktop.
- It is built so the website and the iOS/Android apps can host it.
- Automated checks pass for the money maths, both languages and accessibility.

What I am asking for

Approval of the direction, the story and the neo integration. After that I will request the remaining items (page 13) from the teams involved and finish the release version.

THE READING EXPERIENCE

One page at a time, like a picture book

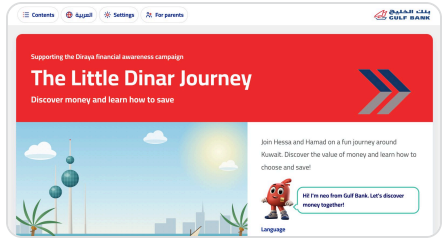

- Arabic is the default. One tap switches to English and keeps the page and all answers.
- Each page has a short story, a hands-on activity and feedback that explains why.
- No timers, scores or wrong-answer alarms. Every child reaches the end.
- Sound and animation start off and can be turned on in Settings.
- Works with touch, mouse, keyboard and screen readers.

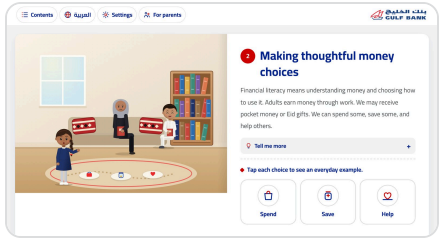

Page 7 on desktop: the illustration sits beside the story, and the activity follows the text.

THE 15 PAGES

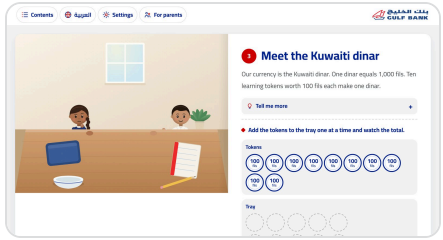

From the first dinar to a real habit

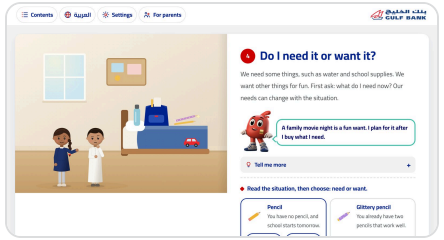

1 Cover and invitation

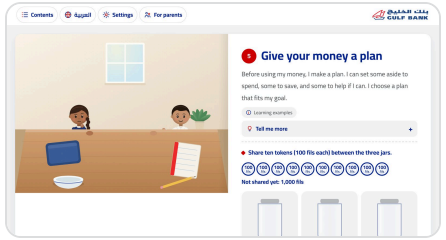

2 Making thoughtful money choices

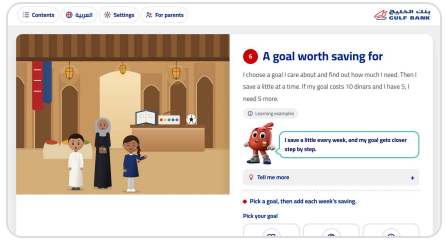

3 Meet the Kuwaiti dinar

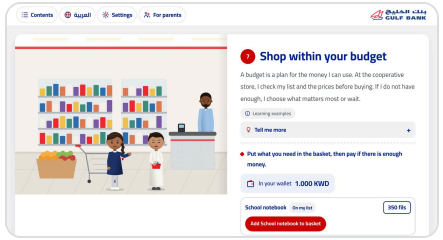

4 Do I need it or want it?

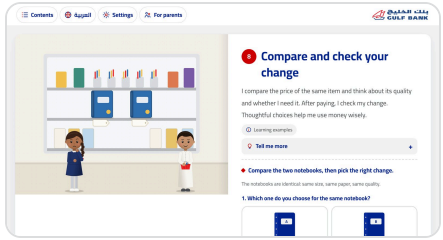

5 Give your money a plan

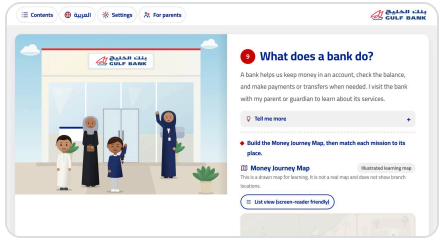

6 A goal worth saving for

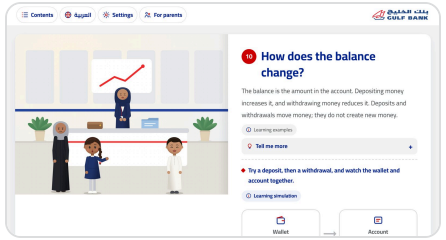

7 Shop within your budget

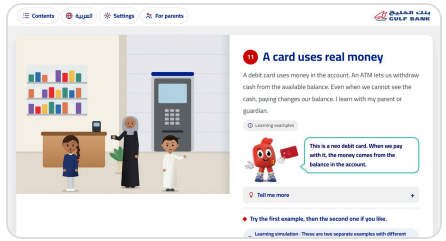

8 Compare and check your change

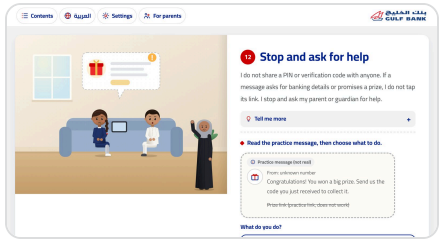

9 What does a bank do? (map puzzle)

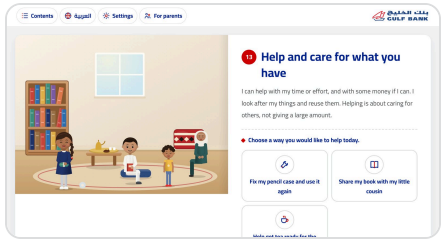

10 How does the balance change?

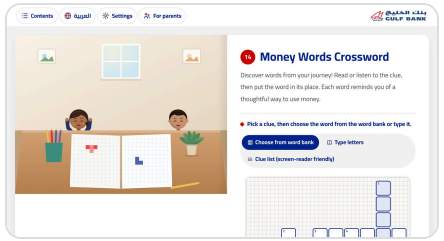

11 A card uses real money

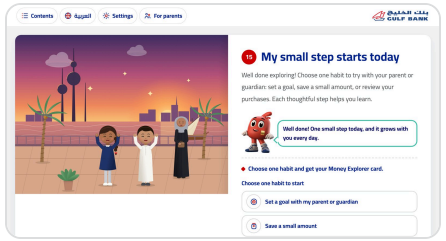

12 Stop and ask for help

13 Help and care for what you have

14 Money Words crossword

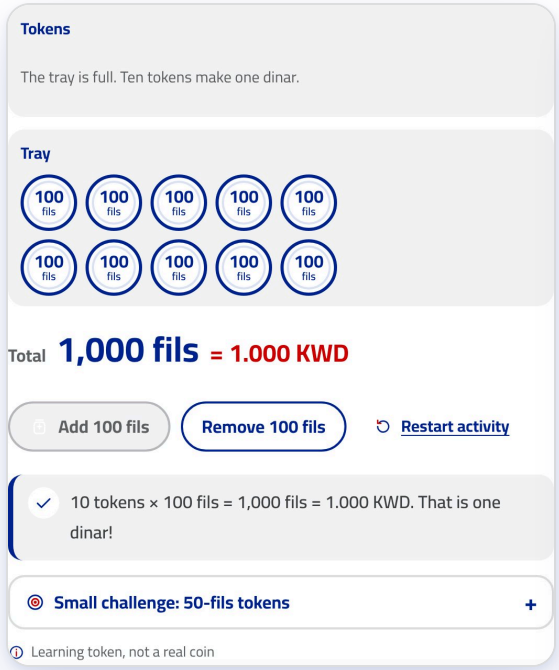

15 My small step starts today

Settings in Kuwait: the Corniche and Kuwait Towers, Souq Al-Mubarakiya, a cooperative store, a bank branch, family homes.

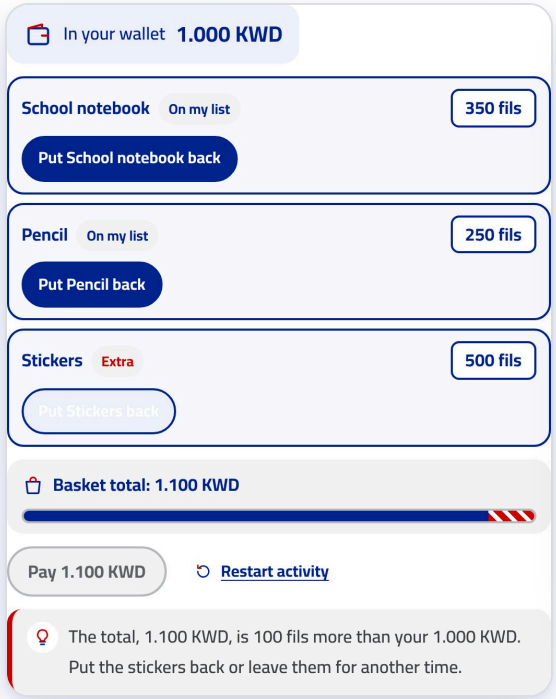

LEARNING BY DOING

Every page has something to try

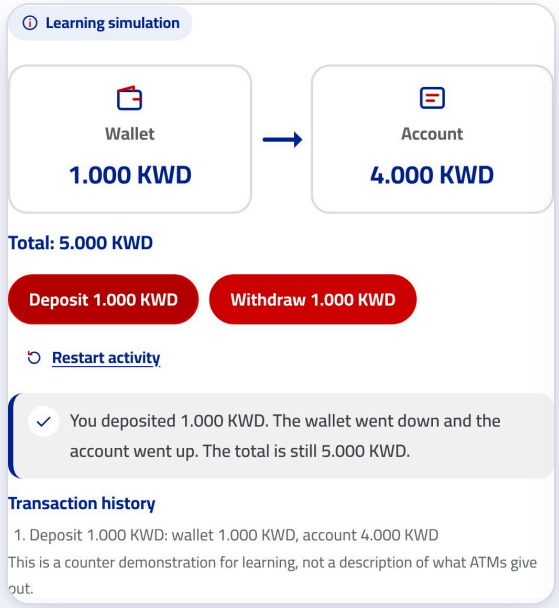

All amounts are fictional learning examples and are labelled that way. Money is calculated in whole fils, so the arithmetic is always exact.

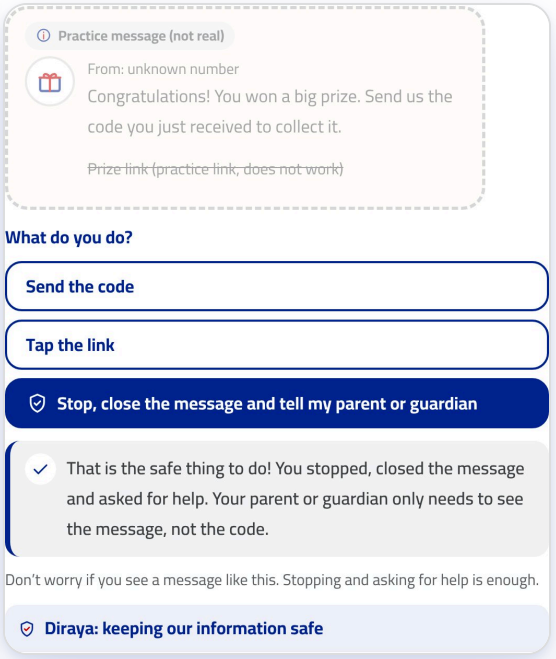

Page 3. Ten 100-fils learning tokens make one dinar (1.000 KWD).

Page 7. The basket is 100 fils over budget, so paying is blocked until the stickers go back.

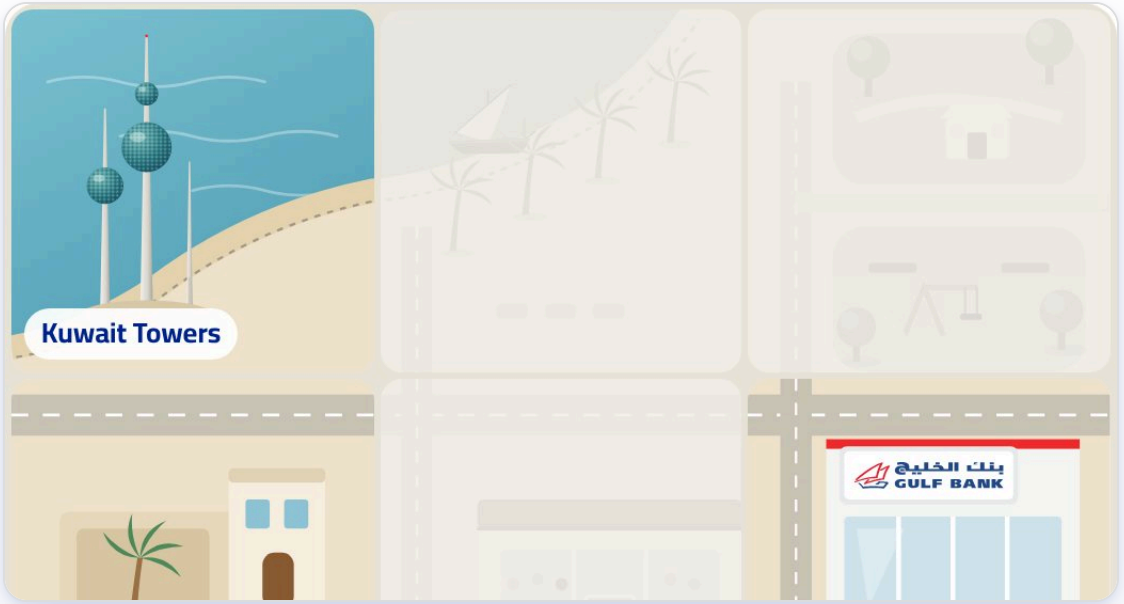

Page 10. Deposits and withdrawals move money between wallet and account. The total stays 5.000 KWD.

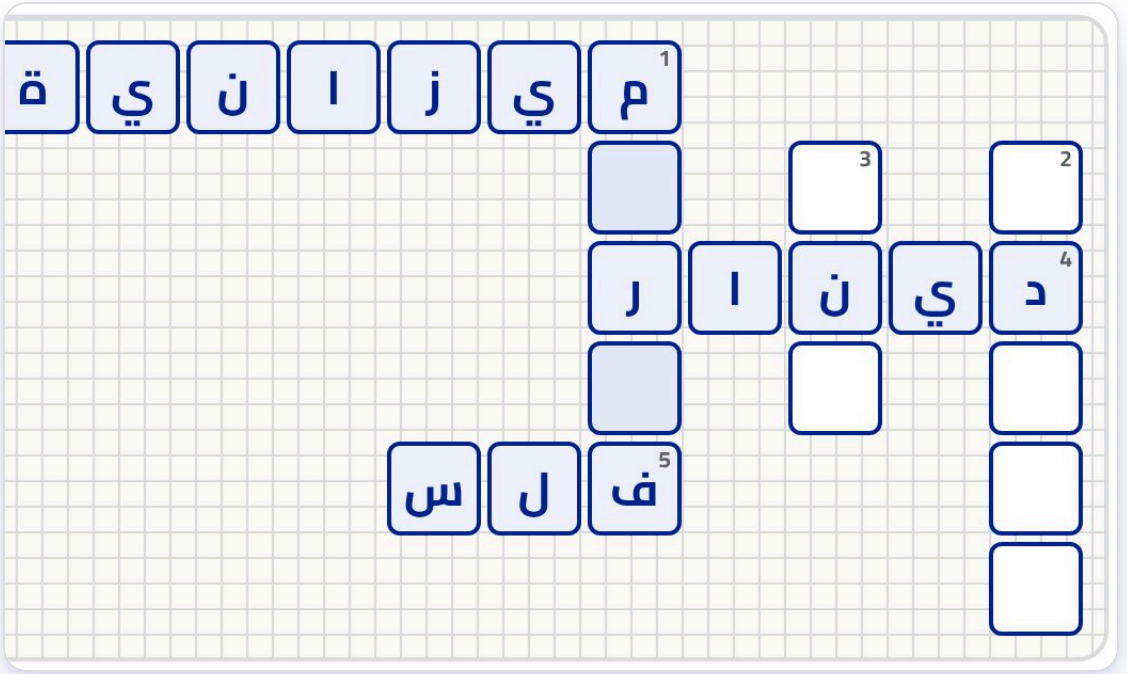

Page 12. A practice message asks for a code. The safe answer: stop and tell a grown-up.

TWO GAMES

A neighbourhood map puzzle and a bilingual crossword

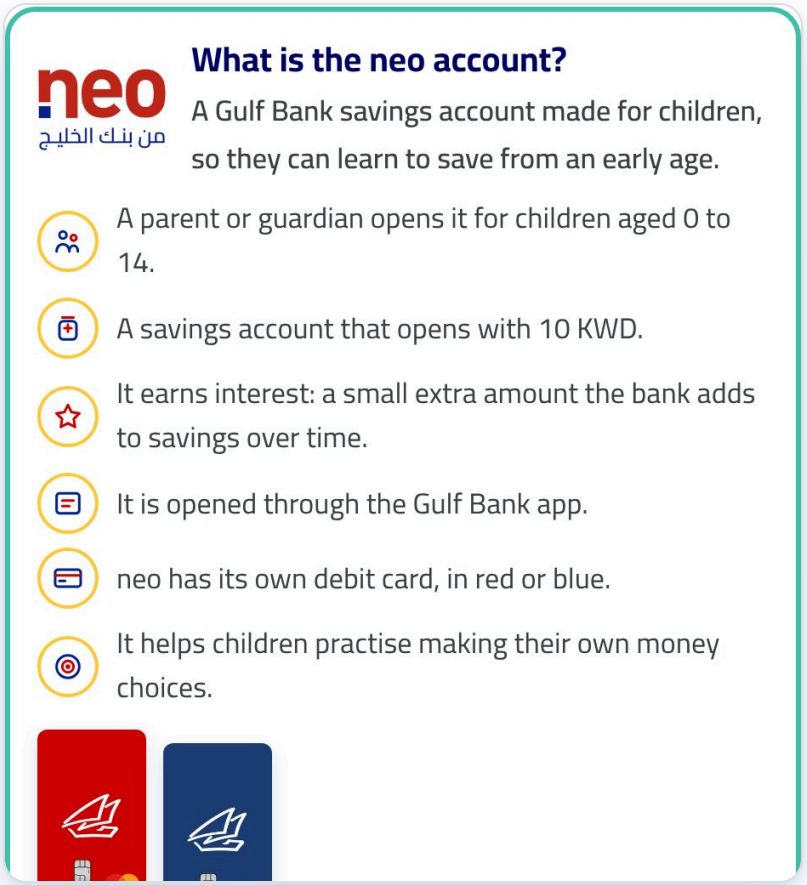

Page 9, Money Journey Map. Children assemble a Kuwaiti neighbourhood (tap, keyboard or drag), then match money missions to places: plan at home, compare prices at the co-op, deposit at the bank.

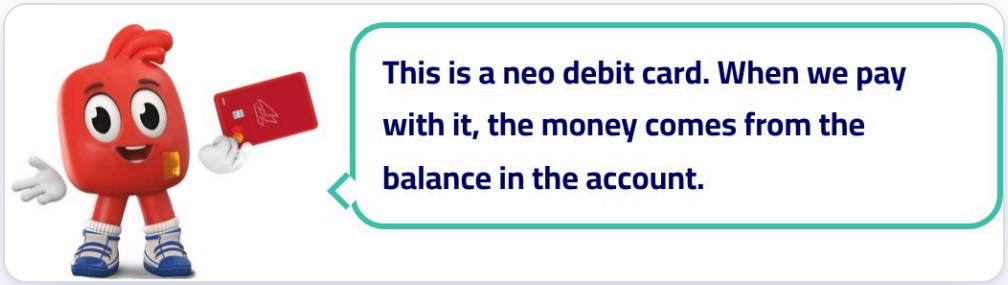

Page 14, Money Words crossword. A separate grid for each language, read right to left in Arabic. Children pick words from a word bank or type them; a clue list gives screen-reader users the same game. An optional four-question quiz follows.

NEO INTEGRATION

neo guides children through the book

Page 1. "What is the neo account?" explains the account and its features in plain words, including what interest means.

Page 11. The official neo animation presents the red and blue debit cards.

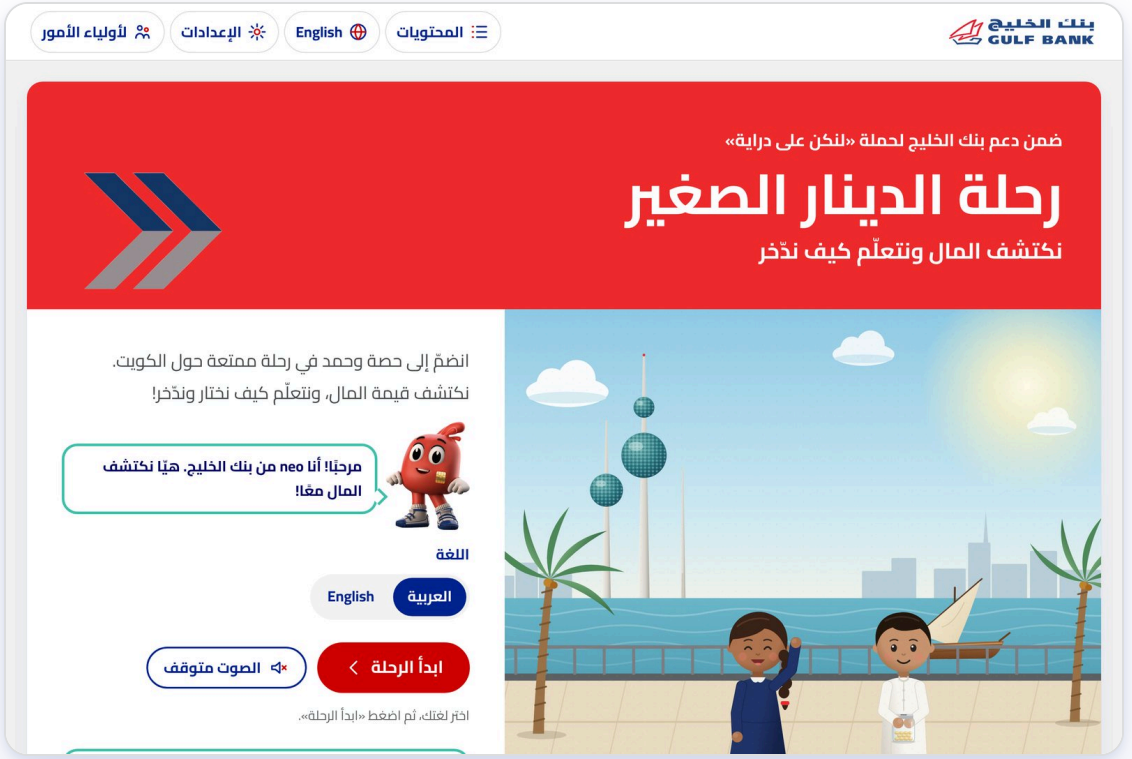

Pages 1, 4, 6, 15. neo's speech bubbles repeat the lesson.

- Page 9 adds a "Meet the neo account" panel for children.
- Account details for parents sit in the parent section, with a note to check current terms.
- No "open an account" buttons anywhere. The account is presented as optional.
- Uses the official neo character, card designs, logo and colours.

BRAND AND CAMPAIGN

Built on the Gulf Bank Brand Guidelines 2026

- **Logo:** the supplied vector artwork, top right on every page, never redrawn or recoloured.
- **Colours:** the published red, blue and grey values. Every text colour pairing passes contrast checks.
- **Type:** Cairo for Arabic and English, hosted with the book.
- **Brand arrows:** the real artwork from the guide, always pointing right or up.
- **Diraya:** text credit on the cover, the last page and the parent section, naming the Central Bank of Kuwait (oversight) and the Kuwait Banking Association (management). No invented campaign artwork, and no claim of CBK or KBA approval.
- **Illustrations:** original artwork for this book, with no third-party images and no AI-generated images.

The Arabic cover with the short Diraya credit above the title.

SAFE FOR CHILDREN AND FOR THE BANK

Nothing a child does here touches real banking

No personal data

The book never asks for a name, photo, age, email, phone or account number. Progress is saved on the device only if a parent turns it on.

No banking connection

No login, no banking APIs, no real transactions, no payment screens and no PIN entry. Every simulation is labelled as one.

No tracking

No analytics, ads or third-party scripts. The book loads nothing from outside the bank's own servers.

Correct money facts

1 KWD = 1,000 fils, real coin values, no other currencies. Prices are marked as learning examples.

Calm safety lesson

Children learn to stop, close a strange message and ask a parent, without fear and without sharing any code.

No pressure

No timers, lives, leaderboards or purchases. A keepsake card at the end, not a certificate.

QUALITY CHECKS

Tested before review, with honest gaps

82 / 82

Unit tests passed

Money maths, crossword grids, both languages complete, contrast, neo content.

89 / 89

Browser checks passed

Every activity played through, language switching, saving progress, website embedding, printing.

0

Accessibility violations

Automated WCAG 2.2 AA scan of all 15 pages in both languages.

225 KB

First load

Target was 2 MB. Main content appears in about 1.3 s on a slow mobile connection.

320 px

Smallest screen tested

No sideways scrolling from small phones to desktop, portrait and landscape.

Not tested yet

Inside the real iOS and Android apps, on Safari, with screen-reader users, and with children. These need the bank's test access.

READY FOR THE WEBSITE AND THE APPS

A self-contained package the bank's teams can host

Website

- Static files, no server code. Can live at a path such as /kids/money-book/.
- Can be embedded in an existing page, with a ready example (and a Django CMS snippet if that is the platform).
- Security header settings documented for the web team.

iOS and Android apps

- Opens in the apps' existing web view. Guidance covers back and close buttons, screen edges, sound and downloads.
- Works without any app changes. An optional close button and page events are available if the app team wants them.
- App release stays with the app teams' normal process.

Handover pack: source code, production build, README, integration guide, brand notes, narration scripts for all 15 pages in both languages, verification report and a release checklist for each team.

DECISIONS FOR MANAGEMENT

Five decisions to move forward

1. **Approve the story, the characters (Hessa and Hamad) and the illustration style**

   The art is original drawn work. It can be upgraded later to commissioned 3D-style illustrations; ready briefs exist for every page.

2. **Approve how neo appears**

   Guide on five pages, a children's panel on page 9, and account details for parents only. neo's lines are a draft and need Marketing sign-off.

3. **Confirm whether account facts may appear**

   Ages 0 to 14, 10 KWD to open, interest, opened in the app, debit card. These come from 2023 materials. They can be hidden with one switch until Compliance confirms them.

4. **Choose narration for launch**

   Recorded human voice, licensed synthetic voice, or launch without audio. Scripts are ready either way.

5. **Confirm the digital logo master**

   The supplied logo file's colours differ slightly from the guide's published values. I kept the logo exactly as supplied.

ITEMS REQUESTED AFTER APPROVAL

What I need to finish the release version

1 Current neo account terms

Or access to the neo page on e-gulfbank.com, which was blocked from my working environment.

Compliance / Marketing

2 Transparent neo master files

The standing character and the card animation without white backgrounds, plus the neo logo as a vector.

Brand

3 Narration recordings or a voice decision

15 pages in Arabic and 15 in English, using the scripts provided.

Marketing

4 Diraya campaign artwork (optional)

Only if a logo is wanted, from the approved media kit with its co-branding rules.

Marketing

5 Editorial review of all text

Arabic and English story, activity and parent copy, plus neo's lines.

Arabic and English editorial

6 Production web addresses

The website and app addresses that will host or embed the book, for the security settings.

Website / Information Security

7 Test access to the iOS and Android apps

To check the book inside the real apps before release.

App teams

8 Accessibility and child testing

A screen-reader review and a short session with children aged 7 to 11.

Accessibility / Marketing

NEXT STEPS

From approval to release

1

Approval

Management approves the draft and the five decisions.

2

Collect items

Teams send the items on page 13.

3

Finish content

Add final neo files, confirmed terms, narration and editorial changes.

4

Staging

Web team hosts the book on a bank test server; apps open it.

5

Reviews

Brand, Compliance, Information Security, Accessibility and a child test.

6

Release

Publish on the website and in the apps.

Request

Approve the draft so I can collect the items above and complete the release version of The Little Dinar Journey with neo.
